U.S. Patent and Trademark Off PTOL-303 (Rev. 11-03)

- 1. Applicant's arguments filed 01/22/2004 have been fully considered but they are not persuasive.
- 2. As per remarks, Applicants' argued that (1) Applicants find no teaching or suggestion that the audio segments of Johnson are related to network-related announcement.
- 3. As to point (1), in response to applicant's arguments, the recitation "the audio segments comprising at least portions of the network-related announcements to be played to a recipient" has not been given patentable weight because the recitation occurs in the preamble. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See In re Hirao, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and Kropa v. Robie, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951). Furthermore, Johnson discloses network-related announcement [ i.e. current system date and time ] [ Johnson, col 5, lines 46-53; and col 6, lines 4-22 ].
- 4. As per remarks, Applicants' argued that (2) Cremia reference is non-analogous art.
- 5. As to point (2), in response to applicant's argument that Cremia reference is nonanalogous art, it has been held that a prior art reference must either be in the field of applicant's endeavor or, if not, then be reasonably pertinent to the particular problem with which the applicant was concerned, in order to be relied upon as a basis for rejection of the claimed invention. See In re Oetiker, 977 F.2d 1443, 24 USPQ2d 1443 (Fed. Cir. 1992). In this case, Cremia reference discloses a method for providing media content to recipients. Furthermore, Cremia reference discloses playing public service announcement [ col 10, lines 4-6 ], and playing system identifier [ col 3, lines 53-61 ].
- 6. As per remarks, Applicants' argued that (3) the motivation and the resulting combination of Johnson and Creamia as failing to establish prima facie obviousness.
- 7. As to point (3), in response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See In re Fine, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988)and In re Jones, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, it would have been obvious to combine the teaching of Johnson and Cremia because it would allow to dynamically play different contents to recipients for value added to the system.
- 8. As per remarks, Applicants' argued that (4) the motivation to combine the references of Johnson, Cremia and Schuster is deficient.
- 9. As to point (4), in response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See In re Fine, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988)and In re Jones, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, it would have been obvious to combine the Schuster reference because adding of MGCP would allow to integrate many other protocols to the system.
- 10. As per remarks, Applicants' argued that (5) the combination of Johnson, Cremia and Mankovitz is improper.
- As to point (5), in response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See In re Fine, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988)and In re Jones, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, Mankovitz discloses many FM broadcast station frequencies to tune to and identify channel to listen, it would have been obvious to combine the teaching of Mankovitz because it would enabling a listener to rapidly and accurately identify broadcast musical selections [ Mankovitz, col 2, lines 1-3 ].
- 12. As per remarks, Applicants traverse (6) the motivation to combine Johnson, Cremia, and Szlam.
- As to point (6), in response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See In re Fine, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988)and In re Jones, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, it would have been obvious to combine the teaching of Szlam because it would allow to expand the capability of the system to support different languages and to satisfy user's request.
